REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: U. S. Pat. 4,521,387 describes a substantially similar process for removing what appears to be the same sulfur contaminants (please see col. 2 Ins. 40-43) out of the same synthesis gas (please see col. 1 Ins. 5-7 and col. 2 Ins. 7-10) via contact with the same Cu/ZnO catalyst (please see col. 2 Ins. 26-39) which has been reduced (please see col. 3 Ins. 32-34). However, the Applicants' independent claim 1 has limited the pressure of the synthesis gas to be at least 15 bars and U. S. Pat. 4,521,387 does not mention any pressures for their synthesis gas. Hence, the claims have been allowed because the examiner cannot produce any evidence establishing that the pressures of the synthesis gases are *inherently* the same. Additionally, the Applicants have argued criticality of their claimed pressures in the Applicants' Reply dated Aug. 6, 2007.

Any comments considered necessary by the applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

OATH

The Oath filed on Feb. 4, 2005 is objected to because non-initialled and non-dated alterations have been made to the mailing addresses of the inventors Jens-Henrik B. Hansen and Inga Sigurdardotir: see 37 CFR 1.52(c). A new oath is required which corrects these deficiencies.
